

Joel Carrasco | Software Engineer

Panama | +507 62575381 | joelcarrasco.sd@gmail.com | [Linkedln](#) | [English C1](#) | github.com/Joel-SD | joelcarrasco.dev

Senior Software Engineer with 5+ years of experience owning complex systems end-to-end. Proven expertise in data-heavy architectures, microservices, and production systems. Proficient in Node.js, React, Angular, and modern backend patterns. Experienced with AI-assisted development tools (Claude, GitHub Copilot). Collaborative engineer delivering reliable, scalable solutions in cross-functional teams.

Experience

Infotree Global Solutions — Dell

Senior Software Engineer

6/2026 - Present

- Maintain and develop disaster recovery analytics platform for Dell's enterprise infrastructure, processing **real-time data** from mission-critical recovery systems.
- Built high-performance **Node.js services and Angular** frontend using Redis caching, complex data structures (**graphs, trees**), and sophisticated business logic patterns.
- Collaborated with Principal Engineer on system design, **code quality** standards, and architectural decisions for enterprise-scale applications.

Hypernova Labs

Full Stack Developer

4/2024 - 6/2026

- **Led end-to-end migration** of multi-tenant SaaS platform from **Node.js + MongoDB to Go + SQL Server**, achieving 40%+ latency reduction on high-traffic endpoints.
- Shipped production REST APIs using **C#/.NET 6** and **Go** with hexagonal architecture, serving 10+ enterprise tenants.
- Optimized SQL Server stored procedures on 25M+ record tables through execution plan analysis and index tuning.
- Maintained **CI/CD** pipelines (**Azure Pipelines, GitHub Actions**) with automated testing (NUnit, xUnit, Jest, SonarQube).

Banco General

Software Developer

1/2024 - 4/2024

- Developed **enterprise application modules** using Java, Angular, TypeScript in a hybrid Agile environment.
- Integrated third-party **REST APIs** and internal services; implemented unit tests and contributed to code quality.

RednBlue

Software Developer

6/2022 - 1/2024

- Built **cross-platform mobile features** in React and React Native (Android/iOS), including dark mode, i18n, deep linking, and OAuth integrations (**Google/Facebook/Apple**).
- Integrated Google Analytics and third-party APIs; created animations with **React Native Reanimated**.

Skills

Backend: Node.js · Go · C#/.NET · Java · REST APIs · Microservices · Data Structures
Databases: SQL Server · PostgreSQL · MongoDB · Redis · Schema Design · Query Optimization
Cloud & DevOps: Azure · Docker · GitHub Actions · CI/CD · SonarQube
Frontend: React · Angular · React Native · Next.js · TypeScript

Education

Universidad Tecnológica de Panamá

- Bachelor's Degree in Software Development
